

The entry card is filled out and a string strung through the hole. The string is tied and then taped to the back of the entry. Leave enough string so that the entry card can hang over the front.

Example of hanger for a 2-D arts exhibits. All 2-D exhibits must have a sturdy, secure hanger! It must be the type that will allow the item to be hung off a hook. Please make sure your hanger is sturdy enough to support the full weight of your item.

You can also tie the entry card to some exhibits. For those that you cannot, the string with entry card attached is taped to the bottom of the entry.
