

January Garden Calendar

Local Horticulture Happenings:

Take your Christmas tree to Long's Park to be used for fish habitat.

Vegetables and Fruits

Pick up and discard fallen fruit before spring arrives to reduce diseases.

As nursery catalogs begin to arrive, look for plants recommended by Extension

Order fruit trees

Flowers

Read seed catalogs and prepare your seed order.

Things you can start: For spring flowers, get unplanted spring bulbs in the ground as soon as possible. Start seeds throughout the winter, depending on growing requirements. Water fall planted perennials to prevent dry soil conditions.

Watch for signs of frost heaving and cover tender roots.

Replace mulch layers.

Check bulbs in storage for rot and decay. Discard damaged ones.

Curl up with a good book and learn more about gardening.

Lawns

Rake fallen leaves that pile up on the lawn to prevent suffocation of grass.

Trees and Shrubs

Allow ice to melt naturally from limbs. Do not use water to melt the ice or attempt to knock it off.

Pruning: Prune storm damaged limbs quickly to reduce damage and prevent tearing of the bark.

Avoid the temptation to prune on warm winter day. You'll prevent further damage.

Bring twigs of flowering trees and shrubs indoors to force blossoms.

Water fall planted trees and shrubs when soil is dry but not frozen.

Watch out for rabbit damage to the bark of trees and shrubs.

Miscellaneous

Clean and repair garden tools during the winter.

Sand and seal tool handles to prevent splinters. Apply brightly colored paint to handles. It makes them easier to spot in the garden.

Keep bird feeders and water supplies filled for the feathered friends.

Evaluate the garden and make notes to assist in next year's planning.

Take photos of the garden and analyze for year-round interest.

Transplant live Christmas tree outside or recycle your Christmas tree
